Energy Policy 1994 **22** (12) 1079–1086

ENERGY POLICY

Index to Volume 22

January–December 1994

Articles – subjects

Biomass and fuelwood

Deciding on biomass in Hässelby. *Brita Olerup*. 20.5, 415–426
Sustainable energy policies for the Brazilian Amazon. *Michael Redclift*. 22.5, 427–431

CHP

Combined heat and power. Positive progress in the UK. *Michael Brown*. 22.2, 173–177
The development of combined heat and power in the UK. *Ken Harvey*. 22.2, 179–181

Coal

Australia's coal industry. Fuel for growth. *Donald W Barnett*. 22.4, 353–367
On the bundling of coal and sulfur dioxide emissions allowances. *Joseph A Doucet and Todd Strauss*. 22.9, 764–770
Energy use in a transitional economy. The case of Poland. *Stephen Myers, Jürgen Salay and Lee Schipper*. 22.8, 699–713
Heseltine's 'reprieved' pits. Twelve months on. *Alistair Bruce*. 22.5, 432–435
Ports and coal transfer. Hub of China's energy supply policy. *Daniel Todd and Zhang Lei*. 22.7, 609–621
A macro-assessment of technology options for CO_2 mitigation in China's energy system. *Zongxin Wu, Jiankun He, Aling Zhang, Qing Xu, Shuyu Zhang and Jayant Sathaye*. 22.11, 907–913
Privatizing British Coal. An evolving policy problem. *Alistair Bruce and Mike Wright*. 22.1, 57–67
The world coal trade. A commentary. *Greg Smith*. 22.6, 443–446

Electricity

On the assessment of utility demand-side management programs. *Mark D Levine and Richard Sonnenblick*. 22.10, 848–856
Cleaning up the grid. Solar thermal electricity development in Australia. *David R Mills, Anthony Monger and Bill Keepin*. 22.4, 297–308
Climate alteration. A global issue for the electric power industry in the 21st century. *G M Hidy and D F Spencer*. 22.12, 1005–1027
Combined heat and power. Positive progress in the UK. *Michael Brown*. 22.2, 173–177
Competitive bidding for independent power. Developments in the USA. *Mel Kliman*. 22.1, 41–56
The consumer's energy analysis environment. *Willett Kempton and Linda L Layne*. 22.10, 857–866
Costing power generation. A case of large-scale hydro and nuclear plants in India. *Priyamvada Zutshi and Preety M Bhandari*. 22.1, 75–80
The development of combined heat and power in the UK. *Ken Harvey*. 22.2, 179–181
Diversity and ignorance in electricity supply investment. Addressing the solution rather than the problem. *Andrew Stirling*. 22.3, 195–216
Dynamics of energy efficient lighting. *Joel Swisher, Lena Christiansson and Claes Hedenström*. 22.7, 581–594
Economic analysis of Ilumex. A project to promote energy-efficient residential lighting in Mexico. *J Sathaye, R Friedmann, S Meyers, O de Buen, A Gadgil, E Vargas and R Saucedo*. 22.2, 163–171
Electric vehicles and the electric utility company. *Andrew Ford*. 22.7, 555–570
Electricity and federalism. Understanding regional diversity. *Clinton J Andrews*. 22.7, 629–638
International influences on electricity supply in Zimbabwe. *Ian H Rowlands*. 22.2, 131–143
Issues in energy subsidies for irrigation pumping. A case study from Mahbubnagar District, Andhra Pradesh, India. *Meera Rajagopalan and Harvey Demaine*. 22.1, 89–95
The potential of hydropower generation in Jordan. Micro-hydropower analysis. *M Hammad, R Aburas and B Abuzahra*. 22.6, 523–530
Reducing Australian energy sector greenhouse gas emissions. *Barry P Jones, Zhao-Yang Peng and Barry Naughten*. 22.3, 270–286
Reshaping the electric power industry. *Christopher Flavin and Nicholas Lenssen*. 22.12, 1029–1044
Stalled on the road to the market. Lessons from a project promoting lighting efficiency in India. *Ashok J Gadgil and M Anjali Sastry*. 22.2, 151–162
Sustainability, value trade offs and electric utility planning. A Canadian example. *Timothy McDaniels*. 22.12, 1045–1054
Utility planning implications of electricity loss reduction in developing countries. The case of Nepal. *Ram M Shrestha and Gopal B Bhattarai*. 22.6, 531–537
Various methods for estimating power outage costs. Some implications and results in Taiwan. *George J Y Hsu, Pao-long Chang and Tser-Yieth Chen*. 22.1, 69–74

Energy conservation and efficiency (*see also* CHP)

Alternative energy strategies for abatement of carbon emissions in Brazil. A cost–benefit analysis. *E L La Rovere, L F L Legey and J D G Miguez*. 22.11, 914–924
On the assessment of utility demand-side management programs. *Mark D Levine and Richard Sonnenblick*. 22.10, 848–856
Been top down so long it looks like bottom up to me. *Hillard G Huntington*. 22.10, 833–839
Calculating the energy requirements of household purchases. A practical step by step method. *B C W van Engelenburg, T F M van Rossum, K Blok and K Vringer*. 22.8, 648–656
Comparable assessment of national GHG abatement costs. *K Halsnæs, G A Mackenzie, J N Swisher and A Villavicencio*. 22.11, 925–934
Constructing CO_2 reduction cost curves. The case of Denmark. *Poul Eirik Morthorst*. 22.11, 964–970

0301-4215/94/12 1079-08 © 1994 Butterworth-Heinemann Ltd

The consumer's energy analysis environment. *Willett Kempton and Linda L Layne*. 22.10, 857–866

Cost of stabilizing GHG emissions. Focus on developing countries. *Jayant Sathaye and John Christensen*. 22.11, 891–893

Costs of CO_2 abatement in Egypt using both bottom-up and top-down approaches. *Yehia El Maghary, A-F Ibrahim, M A-F Shama, A Hassan, M A-H Rifai, M Selim, I Abdel Gelil, H Korkor, Anhar Higazi, A Amin, F Bedewi and Juha Forsström*. 22.11, 935–946

Demand-side management. Overcoming market barriers or obscuring real costs? *Albert L Nichols*. 22.10, 840–847

Divergences in manufacturing energy consumption between the North and the South. *Se-Hark Park and Walter C Labys*. 22.6, 455–469

A dynamic analysis of Japanese energy policies. Their impact on fuel switching and conservation. *F C Perkins*. 22.7, 595–607

Dynamics of energy efficient lighting. *Joel Swisher, Lena Christiansson and Claes Hedenström*. 22.7, 581–594

Economic analysis of Ilumex. A project to promote energy-efficient residential lighting in Mexico. *J Sathaye, R Friedmann, S Meyers, O de Buen, A Gadgil, E Vargas and R Saucedo*. 22.2, 163–171

Economics and rational conservation policy. *Gilbert E Metcalf*. 22.10, 819–825

Editors' introduction to special issue on Markets for energy efficiency. *Hillard Huntington, Lee Schipper and Alan H Sanstad*. 22.10, 795–797

The effects of an increase in energy efficiency on the Kenyan economy. *Haji Hatibu Semboja*. 22.3, 217–225

The energy-efficiency gap. What does it mean? *Adam B Jaffe and Robert N Stavins*. 22.10, 804–810

Energy efficiency trends in Australia. *Bruce Wilson, Luan Ho Trieu and Bruce Bowen*. 22.3, 287–295

Energy and the environment. Something new under the sun? *Joel D Scheraga*. 22.10, 798—803

Energy policies for energy efficiency in office equipment. Case studies from Europe, Japan and the USA. *Cyane B Dandridge, Jacques Roturier and Leslie K Norford*. 22.9, 735–747

Energy policies for sustainable development in developing countries. *Kathleen L Abdalla*. 22.1, 29–36

Energy reform in Central and Eastern Europe. *Janusz Cofala*. 22.6, 486–498

Energy use and carbon implications in India. Focus on industry. *Nandita Mongia, Jayant Sathaye and Puran Mongia*. 22.11, 894–906

Energy use and CO_2 emissions in the West and Central African region. *A O Adegbulugbe and G A Oladosu*. 22.6, 499–508

Energy use in a transitional economy. The case of Poland. *Stephen Myers, Jürgen Salay and Lee Schipper*. 22.8, 699–713

The EU carbon/energy tax. Effects in a distorted market. *Hugo Birkelund, Eystein Gjelsvik and Morten Aaserud*. 20.8, 657–665

Greenhouse gas abatement in Senegal. A case study of least-cost options. *Samir Amous, Dominique Revet and Youba Sokona*. 22.11, 947–954

The impact of carbon taxation on the UK economy. *Paul Ekins*. 22.7, 571–579

Innovation and organizational networks. Barriers to energy efficiency in the US housing industry. *Loren Lutzenhiser*. 22.10, 867–876

Is Britain a Third World country? The case of German refrigerators. *Horace Herring*. 22.9, 779–787

Key challenges facing Thailand in the context of global CO_2 emission abatement. *Giap van Dang, Le Binh Minh and Suvit Yodmani*. 22.11, 971–980

A macro-assessment of technology options for CO_2 mitigation in China's energy system. *Zongxin Wu, Jiankun He, Aling Zhang, Qing Xu, Shuyu Zhang and Jayant Sathaye*. 22.11, 907–913

Methodological lessons and results from UNEP GHG abatement costing studies. The case of Zimbabwe. *R S Maya and Jørgen Fenhann*. 22.11, 955–963

Modeling energy technology choices. Which investment analysis tools are appropriate? *Blake E Johnson*. 22.10, 877–883

Natural gas in the Nordic countries. Patterns and prospects. *Anders Biel, Sten Lorentzon and Sven-Olof Olsson*. 22.3, 227–237

'Normal' markets, market imperfections and energy efficiency. *Alan H Sanstad and Richard B Howarth*. 22.10, 811–818

Reducing Australian energy sector greenhouse gas emissions. *Barry P Jones, Zhao-Yang Peng and Barry Naughten*. 22.3, 270–286

A response to the UK national programme for CO_2 emissions. *Ian Fells and Lisa Woolhouse*. 22.8, 666–684

Restraining energy demand. The stick, the carrot, or the market? *Fereidoon P Sioshansi*. 22.5, 378–392

Stalled on the road to the market. Lessons from a project promoting lighting efficiency in India. *Ashok J Gadgil and M Anjali Sastry*. 22.2, 151–162

Sustainable energy policies for the Brazilian Amazon. *Michael Redclift*. 22.5, 427–431

Sustainable use of energy. A normative energy scenario: 1990–2050. *Jan van Ettinger*. 22.2, 111–118

Technical evidence for assessing the performance of markets affecting energy efficiency. *Jonathan G Koomey and Alan H Sanstad*. 22.10, 826–832

Energy and environment (*see also* CHP; Energy conservation and efficiency; Renewables)

Alternative energy strategies for abatement of carbon emissions in Brazil. A cost-benefit analysis. *E L La Rovere, L F L Legey and J D G Miguez*. 22.11, 914–924

On the bundling of coal and sulfur dioxide emissions allowances. *Joseph A Doucet and Todd Strauss*. 22.9, 764–770

Climate alteration. A global issue for the electric power industry in the 21st century. *G M Hidy and D F Spencer*. 22.12, 1005–1027

Comparable assessment of national GHG abatement costs. *K Halsnæs, G A Mackenzie, J N Swisher and A Villavicencio*. 22.11, 925–934

Constructing CO_2 reduction cost curves. The case of Denmark. *Poul Eirik Morthorst*. 22.11, 964–970

Cost of stabilizing GHG emissions. Focus on developing countries. *Jayant Sathaye and John Christensen*. 22.11, 891–893

Costs of CO_2 abatement in Egypt using both bottom-up and top-down approaches. *Yehia El Maghary, A-F Ibrahim, M A-F Shama, A Hassan, M A-H Rifai, M Selim, I Abdel Gelil, H Korkor, Anhar Higazi, A Amin, F Bedewi and Juha Forsström*. 22.11, 935–946

Economics and rational conservation policy. *Gilbert E Metcalf*. 22.10, 819–825

Editorial for Volume 22. *Nicky France*. 22.1, 3

Editors' introduction to special issue on Markets for energy efficiency. *Hillard Huntington, Lee Schipper and Alan H Sanstad*. 22.10, 795–797

The effects of an increase in energy efficiency on the Kenyan economy. *Haji Hatibu Semboja*. 22.3, 217–225

The embodiment of carbon in imports of manufactured products. Implications for international agreements on greenhouse gas emissions. *Andrew W Wyckoff and Joseph M Roop*. 22.3, 187–194

Energy and the environment. Something new under the sun? *Joel D Scheraga*. 22.10, 798–803

The energy-efficiency gap. What does it mean? *Adam B Jaffe and Robert N Stavins*. 22.10, 804–810

Energy needs and CO_2 emissions. Constructing a formula for just distributions. †*Olav Benestad*. 22.9, 725–734

Energy reform in Central and Eastern Europe. *Janusz Cofala*. 22.6, 486–498

Energy use and carbon implications in India. Focus on industry. *Nandita Mongia, Jayant Sathaye and Puran Mongia*. 22.11, 894–906

Energy use and CO_2 emissions in the West and Central African region. *A O Adegbulugbe and G A Oladosu*. 22.6, 499–508

The environment and economics. The impact of restricting the SO_2 allowance market, *Mark Bernstein, Alex Farrell and James Winebrake*. 22.9, 748–754

Environmentally targeted objectives for reducing acidification in Europe. *C A Gough, P D Bailey, B Biewald, J C I Kuylenstierna and M J Chadwick*. 22.12, 1055–1066

The EU carbon/energy tax. Effects in a distorted market. *Hugo Birkelund, Eystein Gjelsvik and Morten Aaserud*. 20.8, 657–665

George Bush versus Al Gore. Irreversibilities in greenhouse gas accumulation and emission control investment. *Charles D Kolstad*. 22.9, 771–778

Greenhouse gas abatement in Senegal. A case study of least-cost options. *Samir Amous, Dominique Revet and Youba Sokona*. 22.11, 947–954

The impact of carbon taxation on the UK economy. *Paul Ekins*. 22.7, 571–579

Is natural gas really the answer? Targeting natural gas in US climate change mitigation policy. *Jon Kessler, Bruce Schillo, Michael Shelby and Abraham Haspel*. 22.7, 623–628

Key challenges facing Thailand in the context of global CO_2 emission abatement. *Giap van Dang, Le Binh Minh and Suvit Yodmani*. 22.11, 971–980

A macro-assessment of technology options for CO_2 mitigation in China's energy system. *Zongxin Wu, Jiankun He, Aling Zhang, Qing Xu, Shuyu Zhang and Jayant Sathaye*. 22.11, 907–913

Methodological lessons and results from UNEP GHG abatement costing studies. The case of Zimbabwe. *R S Maya and Jørgen Fenhann*. 22.11, 955–963

'Normal' markets, market imperfections and energy efficiency. *Alan H Sanstad and Richard B Howarth*. 22.10, 811–818

Oil spill hazards at the upstream level. A risk management paradigm for a developing country. *Bright Erakpoweri Okogu*. 22.5, 393–402

Passenger car global warming potential. Current and projected levels in the UK. *Joanne Wade, Claire Holman and Malcolm Fergusson*. 22.6, 509–522

Reducing Australian energy sector greenhouse gas emissions. *Barry P Jones, Zhao-Yang Peng and Barry Naughten*. 22.3, 270–286

Reshaping the electric power industry. *Christopher Flavin and Nicholas Lenssen*. 22.12, 1029–1044

A response to the UK national programme for CO_2 emissions. *Ian Fells and Lisa Woolhouse*. 22.8, 666–684

Stalled on the road to the market. Lessons from a project promoting lighting efficiency in India. *Ashok J Gadgil and M Anjali Sastry*. 22.2, 151–162

Sustainability, value trade offs and electric utility planning. A Canadian example. *Timothy McDaniels*. 22.12, 1045–1054

Sustainable energy policies for the Brazilian Amazon. *Michael Redclift*. 22.5, 427–431

Sustainable use of energy. A normative energy scenario: 1990–2050. *Jan van Ettinger*. 22.2, 111–118

Technical evidence for assessing the performance of markets affecting energy efficiency. *Jonathan G Koomey and Alan H Sanstad*. 22.10, 826–832

UK renewable energy strategy. The need for longer-term support. *D A Elliott*. 22.12, 1067–1074

The world coal trade. A commentary. *Greg Smith*. 22.6, 443–446

Energy policy and analysis (*see also* National and regional energy profiles and policies)

Calculating the energy requirements of household purchases. A practical step by step method. *B C W van Engelenburg, T F M van Rossum, K Blok and K Vringer*. 22.8, 648–656

Comparable assessment of national GHG abatement costs. *K Halsnæs, G A Mackenzie, J N Swisher and A Villavicencio*. 22.11, 925–934

A dynamic analysis of Japanese energy policies. Their impact on fuel switching and conservation. *F C Perkins*. 22.7, 595–607

Editor's introduction to special issue on Contemporary issues in Australian energy economics. *A D Owen*. 22.4, 267–269

Editorial for Volume 22. *Nicky France*. 22.1, 3

Editors' introduction to special issue on Markets for energy efficiency. *Hillard Huntington, Lee Schipper and Alan H Sanstad*. 22.10, 795–797

The embodiment of carbon in imports of manufactured products. Implications for international agreements on greenhouse gas emissions. *Andrew W Wyckoff and Joseph M Roop*. 22.3, 187–194

The energy-efficiency gap. What does it mean? *Adam B Jaffe and Robert N Stavins*. 22.10, 804–810

Energy policies for energy efficiency in office equipment. Case studies from Europe, Japan and the USA. *Cyane B Dandridge, Jacques Roturier and Leslie K Norford*. 22.9, 735–747

The environment and economics. The impact of restricting the SO_2 allowance market. *Mark Bernstein, Alex Farrell and James Winebrake*. 22.9, 748–754

The EU carbon/energy tax. Effects in a distorted market. *Hugo Birkelund, Eystein Gjelsvik and Morten Aaserud*. 20.8, 657–665

George Bush versus Al Gore. Irreversibilities in greenhouse gas accumulation and emission control investment. *Charles D Kolstad*. 22.9, 771–778

The impact of carbon taxation on the UK economy. *Paul Ekins*. 22.7, 571–579

Privatizing British Coal. An evolving policy problem. *Alistair Bruce and Mike Wright*. 22.1, 57–67

Quantifying the credibility of energy projections from trends in past data. The US energy sector. *Alexander I Shlyakhter, Daniel M Kammen, Claire L Broido and Richard Wilson*. 22.2, 119–130

Reducing gasoline use. A multipronged approach. *Marc E Norman*. 22.1, 37–39

A response to the UK national programme for CO_2 emissions. *Ian Fells and Lisa Woolhouse*. 22.8, 666–684

Restraining energy demand. The stick, the carrot, or the market? *Fereidoon P Sioshansi*. 22.5, 378–392

Substitution of information for energy. Conceptual background, realities and limits. *Xavier Chen*. 22.1, 15–27

Transport energy in Australia. Policy problems, issues and alternatives. *Bruce Moon*. 22.4, 331–344

UK renewable energy strategy. The need for longer-term support. *D A Elliott*. 22.12, 1067–1074

Energy security and world trade

The embodiment of carbon in imports of manufactured products. Implications for international agreements on greenhouse gas emissions. *Andrew W Wyckoff and Joseph M Roop*. 22.3, 187–194

Diversity and ignorance in electricity supply investment. Addressing the solution rather than the problem. *Andrew Stirling*. 22.3, 195–216

A model of the world uranium market. *Luan Ho Trieu, Eric Savage and Gavan Dwyer*. 22.4, 317–329

Twenty years after the embargo. US oil import dependence and how it can be reduced. *Howard Geller, John DeCicco, Skip Laitner and Christopher Dyson*. 22.6, 471–485

The world coal trade. A commentary. *Greg Smith*. 22.6, 443–446

Energy supply and demand

On the assessment of utility demand-side management programs. *Mark D Levine and Richard Sonnenblick*. 22.10, 848–856

Australia's coal industry. Fuel for growth. *Donald W Barnett*. 22.4, 353–367

Calculating the energy requirements of household purchases. A practical step by step method. *B C W van Engelenburg, T F M van Rossum, K Blok and K Vringer*. 22.8, 648–656

Changing energy intensity in Chinese industry. The relative importance of structural shift and intensity change. *Jonathan E Sinton and Mark D Levine*. 22.3, 239–255

Cleaning up the grid. Solar thermal electricity development in Australia. *David R Mills, Anthony Monger and Bill Keepin*. 22.4, 297–308

Competitive bidding for independent power. Developments in the USA. *Mel Kliman*. 22.1, 41–56

The consumer's energy analysis environment. *Willett Kempton and Linda L Layne*. 22.10, 857–866

Demand-side management. Overcoming market barriers or obscuring real costs? *Albert L Nichols*. 22.10, 840–847

The development of combined heat and power in the UK. *Ken Harvey*. 22.2, 179–181

Dynamics of energy efficient lighting. *Joel Swisher, Lena Christiansson and Claes Hedenström*. 22.7, 581–594

Economic analysis of Ilumex. A project to promote energy-efficient residential lighting in Mexico. *J Sathaye, R Friedmann, S Meyers, O de Buen, A Gadgil, E Vargas and R Saucedo*. 22.2, 163–171

Economics and rational conservation policy. *Gilbert E Metcalf*. 22.10, 819–825

Energy and the community of the poor. Urban settlements, household needs and participatory development in South Africa. *Frik de Beer and Hennie Swanepoel*. 22.2, 145–162

Energy and the environment. Something new under the sun? *Joel D Scheraga*. 22.10, 798–803

The energy-efficiency gap. What does it mean? *Adam B Jaffe and Robert N Stavins*. 22.10, 804–810

Energy use in a transitional economy. The case of Poland. *Stephen Myers, Jürgen Salay and Lee Schipper*. 22.8, 699–713

International influences on electricity supply in Zimbabwe. *Ian H Rowlands*. 22.2, 131–143

LNG development at the turning point and policy issues for Japan. *Tsutomu Toichi*. 22.5, 371–377

Nigeria's household energy sector. Issues and supply/demand frontiers. *G A Oladosu and A O Adegbulugbe*. 22.6, 538–549

'Normal' markets, market imperfections and energy efficiency. *Alan H Sanstad and Richard B Howarth*. 22.10, 811–818

Ports and coal transfer. Hub of China's energy supply policy. *Daniel Todd and Zhang Lei*. 22.7, 609–621

Quantifying the credibility of energy projections from trends in past data. The US energy sector. *Alexander I Shlyakhter, Daniel M Kammen, Claire L Broido and Richard Wilson*. 22.2, 119–130

Restraining energy demand. The stick, the carrot, or the market? *Fereidoon P Sioshansi*. 22.5, 378–392

Rural energy planning in India. Designing effective intervention strategies. *Chandra Shekhar Sinha, Ramana P Venkata and Veena Joshi*. 22.5, 403–414

The supply of gas to Europe. *Michael Prior*. 22.6, 447–454

Technical evidence for assessing the performance of markets affecting energy efficiency. *Jonathan G Koomey and Alan H Sanstad*. 22.10, 826–832

Energy technology (*see also* CHP)

Been top down so long it looks like bottom up to me. *Hillard G Huntington*. 22.10, 833–839

Cleaning up the grid. Solar thermal electricity development in Australia. *David R Mills, Anthony Monger and Bill Keepin*. 22.4, 297–308

Climate alteration. A global issue for the electric power industry in the 21st century. *G M Hidy and D F Spencer*. 22.12, 1005–1027

Deciding on biomass in Hässelby. *Brita Olerup*. 20.5, 415–426

Dynamics of energy efficient lighting. *Joel Swisher, Lena Christiansson and Claes Hedenström*. 22.7, 581–594

Economic analysis of Ilumex. A project to promote energy-efficient residential lighting in Mexico. *J Sathaye, R Friedmann, S Meyers, O de Buen, A Gadgil, E Vargas and R Saucedo*. 22.2, 163–171

Energy and the environment. Something new under the sun? *Joel D Scheraga*. 22.10, 798–803

The energy-efficiency gap. What does it mean? *Adam B Jaffe and Robert N Stavins*. 22.10, 804–810

Innovation and organizational networks. Barriers to energy efficiency in the US housing industry. *Loren Lutzenhiser*. 22.10, 867–876

Modeling energy technology choices. Which investment analysis tools are appropriate? *Blake E Johnson*. 22.10, 877–883

'Normal' markets, market imperfections and energy efficiency. *Alan H Sanstad and Richard B Howarth*. 22.10, 811–818

Reshaping the electric power industry. *Christopher Flavin and Nicholas Lenssen*. 22.12, 1029–1044

Stalled on the road to the market. Lessons from a project promoting lighting efficiency in India. *Ashok J Gadgil and M Anjali Sastry*. 22.2, 151–162

Technical evidence for assessing the performance of markets affecting energy efficiency. *Jonathan G Koomey and Alan H Sanstad*. 22.10, 826–832

LDCs

Alternative energy strategies for abatement of carbon emissions in Brazil. A cost-benefit analysis. *E L La Rovere, L F L Legey, and J D G Miguez*. 22.11, 914–924

Changing energy intensity in Chinese industry. The relative importance of structural shift and intensity change. *Jonathan E Sinton and Mark D Levine*. 22.3, 239–255

Comparable assessment of national GHG abatement costs. *K Halsnæs, G A Mackenzie, J N Swisher and A Villavicencio*. 22.11, 925–934

Cost of stabilizing GHG emissions. Focus on developing countries. *Jayant Sathaye and John Christensen*. 22.11, 891–893

Costs of CO_2 abatement in Egypt using both bottom-up and top-down approaches. *Yehia El Maghary, A-F Ibrahim, M A-F Shama, A Hassan M A-H Rifai, M Selim, I Abdel Gelil, H Korkor, Anhar Higazi, A Amin, F Bedewi and Juha Forsström*. 22.11, 935–946

Divergences in manufacturing energy consumption between the North and the South. *Se-Hark Park and Walter C Labys*. 22.6, 455–469

Economic analysis of Ilumex. A project to promote energy-efficient residential lighting in Mexico. *J Sathaye, R Friedmann, S Meyers, O de Buen, A Gadgil, E Vargas and R Saucedo*. 22.2, 163–171

The effects of an increase in energy efficiency on the Kenyan economy. *Haji Hatibu Haji Semboja*. 22.3, 217–225

Energy and the community of the poor. Urban settlements, household needs and participatory development in South Africa. *Frik de Beer and Hennie Swanepoel*. 22.2, 145–162

Energy policies for sustainable development in developing countries. *Kathleen L Abdalla*. 22.1, 29–36

Energy use and carbon implications in India. Focus on industry. *Nandita Mongia, Jayant Sathaye and Puran Mongia*. 22.11, 894–906

Greenhouse gas abatement in Senegal. A case study of least-cost options. *Samir Amous, Dominique Revet and Youba Sokona*. 22.11, 947–954

International influences on electricity supply in Zimbabwe. *Ian H Rowlands*. 22.2, 131–143

Issues in energy subsidies for irrigation pumping. A case study from Mahbubnagar District, Andhra Pradesh, India. *Meera Rajagopalan and Harvey Demaine*. 22.1, 89–95

Key challenges facing Thailand in the context of global CO_2 emission abatement. *Giap van Dang, Le Binh Minh and Suvit Yodmani*. 22.11, 971–980

A macro-assessment of technology options for CO_2 mitigation in China's energy system. *Zongxin Wu, Jiankun He, Aling Zhang, Qing Xu, Shuyu Zhang and Jayant Sathaye*. 22.11, 907–913

Methodological lessons and results from UNEP GHG abatement costing studies. The case of Zimbabwe. *R S Maya and Jørgen Fenhann*. 22.11, 955–963

Nigeria's household energy sector. Issues and supply/demand frontiers. *G A Oladosu and A O Adegbulugbe*. 22.6, 538–549

Oil spill hazards at the upstream level. A risk management paradigm for a developing country. *Bright Erakpoweri Okogu*. 22.5, 393–402

Ports and coal transfer. Hub of China's energy supply policy. *Daniel Todd and Zhang Lei*. 22.7, 609–621

The potential of hydropower generation in Jordan. Micro-hydropower analysis. *M Hammad, R Aburas and B Abuzahra*. 22.6, 523–530

The rationale for reducing the subsidy on LPG in India. *Kapil Thukral and Preety M Bhandari*. 22.1, 81–87

Rural energy planning in India. Designing effective intervention strategies. *Chandra Shekhar Sinha, Ramana P Venkata and Veena Joshi*. 22.5, 403–414

Stalled on the road to the market. Lessons from a project promoting lighting efficiency in India. *Ashok J Gadgil and M Anjali Sastry*. 22.2, 151–162

Sustainable energy policies for the Brazilian Amazon. *Michael Redclift*. 22.5, 427–431

Utility planning implications of electricity loss reduction in developing countries. The case of Nepal. *Ram M Shrestha and Gopal B Bhattarai*. 22.6, 531–537

Various methods for estimating power outage costs. Some implications and results in Taiwan. *George J Y Hsu, Pao-long Chang and Tser-Yieth Chen*. 22.1, 69–74

National and regional energy profiles and policies

Alternative energy strategies for abatement of carbon emissions in Brazil. A cost-benefit analysis. *E L La Rovere, L F L Legey and J D G Miguez*. 22.11, 914–924

Australia's coal industry. Fuel for growth. *Donald W Barnett*. 22.4, 353–367
The Australia–Indonesia Zone of Cooperation Treaty. *Michael Hitchens*. 22.4, 345–351
On the bundling of coal and sulfur dioxide emissions allowances. *Joseph A Doucet and Todd Strauss*. 22.9, 764–770
Changing energy intensity in Chinese industry. The relative importance of structural shift and intensity change. *Jonathan E Sinton and Mark D Levine*. 22.3, 239–255
Cleaning up the grid. Solar thermal electricity development in Australia. *David R Mills, Anthony Monger and Bill Keepin*. 22.4, 297–308
Combined heat and power. Positive progress in the UK. *Michael Brown*. 22.2, 173–177
Competitive bidding for independent power. Developments in the USA. *Mel Kliman*. 22.1, 41–56
Constructing CO_2 reduction cost curves. The case of Denmark. *Poul Eirik Morthorst*. 22.11, 964–970
Cost of stabilizing GHG emissions. Focus on developing countries. *Jayant Sathaye and John Christensen*. 22.11, 891–893
Costing power generation. A case of large-scale hydro and nuclear plants in India. *Priyamvada Zutshi and Preety M Bhandari*. 22.1, 75–80
The development of combined heat and power in the UK. *Ken Harvey*. 22.2, 179–181
Costs of CO_2 abatement in Egypt using both bottom-up and top-down approaches. *Yehia El Maghary, A-F Ibrahim, M A-F Shama, A Hassan, M A-H Rifai, M Selim, I Abdel Gelil, H Korkor, Anhar Higazi, A Amin, F Bedewi and Juha Forsström*. 22.11, 935–946
Deciding on biomass in Hässelby. *Brita Olerup*. 20.5, 415–426
The development of combined heat and power in the UK. *Ken Harvey*. 22.2, 179–181
Diversity and ignorance in electricity supply investment. Addressing the solution rather than the problem. *Andrew Stirling*. 22.3, 195–216
A dynamic analysis of Japanese energy policies. Their impact on fuel switching and conservation. *F C Perkins*. 22.7, 595–607
Economic analysis of Ilumex. A project to promote energy-efficient residential lighting in Mexico. *J Sathaye, R Friedmann, S Meyers, O de Buen, A Gadgil, E Vargas and R Saucedo*. 22.2, 163–171
Editor's introduction to special issue on Contemporary issues in Australian energy economics. *A D Owen*. 22.4, 267–269
The effects of an increase in energy efficiency on the Kenyan economy. *Haji Hatibu Semboja*. 22.3, 217–225
Electricity and federalism. Understanding regional diversity. *Clinton J Andrews*. 22.7, 629–638
Energy and the community of the poor. Urban settlements, household needs and participatory development in South Africa. *Frik de Beer and Hennie Swanepoel*. 22.2, 145–162
Energy efficiency trends in Australia. *Bruce Wilson, Luan Ho Trieu and Bruce Bowen*. 22.3, 287–295
Energy policies for energy efficiency in office equipment. Case studies from Europe, Japan and the USA. *Cyane B Dandridge, Jacques Roturier and Leslie K Norford*. 22.9, 735–747
Energy reform in Central and Eastern Europe. *Janusz Cofala*. 22.6, 486–498
Energy use and carbon implications in India. Focus on industry. *Nandita Mongia, Jayant Sathaye and Puran Mongia*. 22.11, 894–906
Energy use and CO_2 emissions in the West and Central African region. *A O Adegbulugbe and G A Oladosu*. 22.6, 499–508
Energy use in a transitional economy. The case of Poland. *Stephen Myers, Jürgen Salay and Lee Schipper*. 22.8, 699–713
The environment and economics. The impact of restricting the SO_2 allowance market, *Mark Bernstein, Alex Farrell and James Winebrake*. 22.9, 748–754
Environmentally targeted objectives for reducing acidification in Europe. *C A Gough, P D Bailey, B Biewald, J C I Kuylenstierna and M J Chadwick*. 22.12, 1055–1066
The EU carbon/energy tax. Effects in a distorted market. *Hugo Birkelund, Eystein Gjelsvik and Morten Aaserud*. 20.8, 657–665
George Bush versus Al Gore. Irreversibilities in greenhouse gas accumulation and emission control investment. *Charles D Kolstad*. 22.9, 771–778
Greenhouse gas abatement in Senegal. A case study of least-cost options. *Samir Amous, Dominique Revet and Youba Sokona*. 22.11, 947–954
Heseltine's 'reprieved' pits. Twelve months on. *Alistair Bruce*. 22.5, 432–435
The impact of carbon taxation on the UK economy. *Paul Ekins*. 22.7, 571–579
Innovation and organizational networks. Barriers to energy efficiency in the US housing industry. *Loren Lutzenhiser*. 22.10, 867–876
International influences on electricity supply in Zimbabwe. *Ian H Rowlands*. 22.2, 131–143
Is Britain a Third World country? The case of German refrigerators. *Horace Herring*. 22.9, 779–787
Is natural gas really the answer? Targeting natural gas in US climate change mitigation policy. *Jon Kessler, Bruce Schillo, Michael Shelby and Abraham Haspel*. 22.7, 623–628
Issues in energy subsidies for irrigation pumping. A case study from Mahbubnagar District, Andhra Pradesh, India. *Meera Rajagopalan and Harvey Demaine*. 22.1, 89–95
The Kazakh oil industry. A potential critical role in Central Asia. *James P Dorian, Shakarim F Zhanseitov and S Hartono Indriyanto*. 22.8, 685–698
Key challenges facing Thailand in the context of global CO_2 emission abatement. *Giap van Dang, Le Binh Minh and Suvit Yodmani*. 22.11, 971–980
LNG development at the turning point and policy issues for Japan. *Tsutomu Toichi*. 22.5, 371–377
A macro-assessment of technology options for CO_2 mitigation in China's energy system. *Zongxin Wu, Jiankun He, Aling Zhang, Qing Xu, Shuyu Zhang and Jayant Sathaye*. 22.11, 907–913
Methodological lessons and results from UNEP GHG abatement costing studies. The case of Zimbabwe. *R S Maya and Jørgen Fenhann*. 22.11, 955–963
Natural gas industry transformation, competitive institutions and the role of regulation. Lessons from open access to US natural gas markets. *Arthur De Vany and W David Walls*. 22.9, 755–763
Natural gas in the Nordic countries. Patterns and prospects. *Anders Biel, Sten Lorentzon and Sven-Olof Olsson*. 22.3, 227–237
Nigeria's household energy sector. Issues and supply/demand frontiers. *G A Oladosu and A O Adegbulugbe*. 22.6, 538–549
Passenger car global warming potential. Current and projected levels in the UK. *Joanne Wade, Claire Holman and Malcolm Fergusson*. 22.6, 509–522
Ports and coal transfer. Hub of China's energy supply policy. *Daniel Todd and Zhang Lei*. 22.7, 609–621
The potential of hydropower generation in Jordan. Micro-hydropower analysis. *M Hammad, R Aburas and B Abuzahra*. 22.6, 523 -530
Privatizing British Coal. An evolving policy problem. *Alistair Bruce and Mike Wright*. 22.1, 57–67
Quantifying the credibility of energy projections from trends in past data. The US energy sector. *Alexander I Shlyakhter, Daniel M Kammen, Claire L Broido and Richard Wilson*. 22.2, 119–130
The rationale for reducing the subsidy on LPG in India. *Kapil Thukral and Preety M Bhandari*. 22.1, 81–87
Reducing Australian energy sector greenhouse gas emissions. *Barry P Jones, Zhao-Yang Peng and Barry Naughten*. 22.3, 270–286
A response to the UK national programme for CO_2 emissions. *Ian Fells and Lisa Woolhouse*. 22.8, 666–684
Restraining energy demand. The stick, the carrot, or the market? *Fereidoon P Sioshansi*. 22.5, 378–392
Rural energy planning in India. Designing effective intervention strategies. *Chandra Shekhar Sinha, Ramana P Venkata and Veena Joshi*. 22.5, 403–414
Stalled on the road to the market. Lessons from a project promoting lighting efficiency in India. *Ashok J Gadgil and M Anjali Sastry*. 22.2, 151–162
The supply of gas to Europe. *Michael Prior*. 22.6, 447–454

Sustainability, value trade offs and electric utility planning. A Canadian example. *Timothy McDaniels*. 22.12, 1045–1054
Sustainable energy policies for the Brazilian Amazon. *Michael Redclift*. 22.5, 427–431
Transport energy in Australia. Policy problems, issues and alternatives. *Bruce Moon*. 22.4, 331–344
Twenty years after the embargo. US oil import dependence and how it can be reduced. *Howard Geller, John DeCicco, Skip Laitner and Christopher Dyson*. 22.6, 471–485
UK renewable energy strategy. The need for longer-term support. *D A Elliott*. 22.12, 1067–1074
Utility planning implications of electricity loss reduction in developing countries. The case of Nepal. *Ram M Shrestha and Gopal B Bhattarai*. 22.6, 531–537
Western Australian natural gas. *Frank Harman*. 22.4, 309–316

Nuclear power

Costing power generation. A case of large-scale hydro and nuclear plants in India. *Priyamvada Zutshi and Preety M Bhandari*. 22.1, 75–80
A Model, of the world uranium market. *Luan Ho Trieu, Eric Savage and Gavan Dwyer*. 22.4, 317–329

Oil and gas

The Australia–Indonesia Zone of Cooperation Treaty. *Michael Hitchens*. 22.4, 345–351
The EU carbon/energy tax. Effects in a distorted market. *Hugo Birkelund, Eystein Gjelsvik and Morten Aaserud*. 20.8, 657–665
Is natural gas really the answer? Targeting natural gas in US climate change mitigation policy. *Jon Kessler, Bruce Schillo, Michael Shelby and Abraham Haspel*. 22.7, 623–628
The Kazakh oil industry. A potential critical role in Central Asia. *James P Dorian, Shakarim F Zhanseitov and S Hartono Indriyanto*. 22.8, 685–698
LNG development at the turning point and policy issues for Japan. *Tsutomu Toichi*. 22.5, 371–377
Natural gas industry transformation, competitive institutions and the role of regulation. Lessons from open access to US natural gas markets. *Arthur De Vany and W David Walls*. 22.9, 755–763
Natural gas in the Nordic countries. Patterns and prospects. *Anders Biel, Sten Lorentzon and Sven-Olof Olsson*. 22.3, 227–237
Oil spill hazards at the upstream level. A risk management paradigm for a developing country. *Bright Erakpoweri Okogu*. 22.5, 393–402
The rationale for reducing the subsidy on LPG in India. *Kapil Thukral and Preety M Bhandari*. 22.1, 81–87
Reducing gasoline use. A multipronged approach. *Marc E Norman*. 22.1, 37–39
The supply of gas to Europe. *Michael Prior*. 22.6, 447–454
Transport energy in Australia. Policy problems, issues and alternatives. *Bruce Moon*. 22.4, 331–344
Twenty years after the embargo. US oil import dependence and how it can be reduced. *Howard Geller, John DeCicco, Skip Laitner and Christopher Dyson*. 22.6, 471–485
Western Australian natural gas. *Frank Harman*. 22.4, 309–316

Renewables (*see also* Biomass and fuelwood)

Diversity and ignorance in electricity supply investment. Addressing the solution rather than the problem. *Andrew Stirling*. 22.3, 195–216
Cleaning up the grid. Solar thermal electricity development in Australia. *David R Mills, Anthony Monger and Bill Keepin*. 22.4, 297–308
Reducing Australian energy sector greenhouse gas emissions. *Barry P Jones, Zhao-Yang Peng and Barry Naughten*. 22.3, 270–286
Sustainable energy policies for the Brazilian Amazon. *Michael Redclift*. 22.5, 427–431
UK renewable energy strategy. The need for longer-term support. *D A Elliott*. 22.12, 1067–1074

Communications on energy

The damage costs of climate change. A note on tangibles and intangibles, applied to DICE. *Richard S J Tol*. 20.5, 436–438
The effect of vehicle speeds on emissions. *Malcolm Fergusson*. 22.2, 103–106
A global fossil free energy scenario. Towards climate stabilization? *Stewart Boyle*. 22.2, 106–109
The present situation and characteristics of China's energy consumption. *Zhang Quanguo, Zhang Baiziang, Liu Shengyong, Guo Xiaohe and He Chuanfu* 22.12, 1075–1077

Forums

Diversity in electricity supply. A response to the reply of Lucas *et al*. *Andrew Stirling*. 22.12, 987–990
Energy efficiency and energy savings. *Leonard G Brookes*. 22.12, 991–992
Energy input–output tables. *John L R Proops*. 22.12, 987
Oil geopolitics comes of age. The new dilemmas. *Paul Tempest*. 22.12, 990–991

Viewpoints

Energy markets and energy policies after the White Paper. *Alex Henney*. 22.1, 5–13
The energy sector and the future of EC environmental liability law. The need for eclecticism. *Anthony G Heyes*. 22.2, 99–101
Oil and money. Economic theory and the Brent System. *Ferdinand E Banks*. 22.12,
Russia's nuclear power safety. An alternative proposal. *Andrei A Konoplyanik and Victor V Nechaev*. 22.12, 1002–1004
UK policy for nuclear decommissioning. *John Surrey*. 22.9, 723–724
Will the UK power pool keep the lights on? *Steve Thomas*. 22.8, 643–647

Letters

The Brookes-Grubb debate. *Horace Herring*. 22.3, 257

Book reviews

Roger Bate and Julian Morris. *Global Warming: Apocalypse or Hot Air?* (Anthony G Heyes) 22.7, 639–640

Meetings on energy

22.2, 182–184; 22.3, 259–260; 22.6, 550; 22.8, 714–715; 22.9, 788–789; 22.10, 884–885

Publications

22.3, 260
